

Totana, January 13nd, 2012

Dear Sir,

With regard to the new regulation REACH, we inform you that, as a manufacturer of offset printing inks, we are considered in REACH as intermediary users. Moreover, it is important to clarify the main points to that regard:

- 1/- Our company asked for the REACH **pre-registration** situation to all our suppliers.
- 2/- During the **pre-register** period (from June 1st till November 30th, 2008), we will select the suppliers who are effectively **pre-registered**. If they do not comply with that requirement, we will find an alternative supplier effective before November 30th, 2008.
- 3/- By November 30th, 2008, **we will use products pre-registered by the REACH regulation only**, none is present in the list of "substances of very high concern. "
- 4/- In the case we had our own production of any raw material or product, we would apply for pre-registration ourselves.
- 5/- In any case, in all the affected products and components, we will submit ourselves to the REACH regulation.

Best regards,

Javier Guerrero
